

# Group Health Research Institute: Growth in funding diversity, productivity, and reach

## Our performance in 2014

With the outlook for federal research funding uncertain in 2014, Group Health Research Institute (GHRI) made strides toward diversifying our sources of revenue. We continue to receive more than half our funding from the National Institutes of Health (NIH), but we successfully increased or maintained support from other sponsors, including the Patient-Centered Outcomes Research Institute (PCORI) and biomedical industry partners.

We also experienced growth in our number of peer-reviewed publications and active grants in 2014—publishing more papers and overseeing more grants than ever before. This increased productivity was met with a revamped effort to disseminate our research through social media and our public website—helping broaden our influence and ensure our practical findings reach policymakers, providers, patients, and the public.

Grant dollars awarded (in millions per year)

2014 Revenue by sponsor (% of total)

Number of active grants

### Financial statement

<b>Revenue</b>	
Federal grant and contract revenue	\$31.9 million
Other sponsored revenue	\$10.5 million
Group Health Cooperative support	\$3.4 million
<b>Total revenues</b>	<b>\$45.8 million</b>
<b>Expense</b>	
Personnel expenses	\$28.5 million
Other expenses	\$17.3 million
<b>Total expenses</b>	<b>\$45.8 million</b>
<b>Net gain/loss</b>	<b>\$0</b>

### Number of grants submitted

### Publications in peer-reviewed journals

Financial stability. Scientific excellence.  
Practical research that improves the  
lives of people everywhere.
